

IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF CALIFORNIA

CLAIRE DELACRUZ, individually,
and on behalf of other members of
the general public similarly
situated,

Plaintiff,

v.

CYTOSPORT, INC., a California
Corporation,

Defendant.

No. C 11-3532 CW

ORDER GRANTING IN
PART AND DENYING
IN PART
DEFENDANT'S MOTION
TO DISMISS SECOND
AMENDED COMPLAINT
(Docket No. 36)

After the Court dismissed in part Plaintiff Claire Delacruz's First Amended Complaint (1AC) with leave to amend, she filed her Second Amended Complaint (2AC). Like the 1AC, the 2AC alleges a putative consumer class action based on certain representations made about Defendant Cytosport's products, "Muscle Milk® Ready-To-Drink" (RTD) and "Muscle Milk® Bars." In the 2AC Plaintiff continues to allege claims under the California Consumer Legal Remedies Act (CLRA), the Unfair Competition Law (UCL), and the False Advertising Law (FAL), as well as common law claims for fraud, negligent misrepresentation and unjust enrichment.

1 Defendant moves to dismiss the 2AC under Federal Rules of Civil
2 Procedure 8(a)(2), 9(b) and 12(b)(6).¹

3 Having considered all of the parties' submissions and oral
4 argument, the Court grants in part Defendant's motion to dismiss
5 and denies it in part. Docket No. 36.

6 BACKGROUND

7 The Court granted Defendant's motion to dismiss Plaintiff's
8 First Amended Complaint, except to the extent that the claims were
9 based on statements made on the fourteen ounce Muscle Milk® RTD
10 packaging, specifically, the representation that the product
11 contained "health fats" in connection with the assertion that it
12 was a "nutritional" drink. The Court found that the "Healthy,
13 Sustained Energy" claim on the RTD label was not actionable
14 because the term "healthy" is difficult to define and Plaintiff
15 had not alleged that the drink contained unhealthy amounts of fat,
16 saturated fat or calories from fat, based on any objective
17 criteria. The Court also found that the "25g protein FOR HEALTHY,
18 SUSTAINED ENERGY" was not a cognizable misrepresentation because
19 Plaintiff did not claim that the bars did not contain that amount
20 of protein. Furthermore, the "0g Trans Fat" statement on the
21 label was not misleading because Plaintiff had not alleged that
22 the bars actually contained trans fats.

23
24 ¹ The title page and notice for Defendants' motion to dismiss
25 cites Federal Rule of Civil Procedure 12(b)(1), as an additional
26 basis for their request for dismissal. However, because the legal
27 standard for dismissal for lack of subject matter jurisdiction was
28 not recited in the memorandum of points and authorities and
Defendants did not otherwise argue the issue in its brief, the
Court does not address it. The Court's order on Defendants' first
motion to dismiss addressed Article III standing.

1 The Court authorized Plaintiff to amend her complaint,
2 remedying the defects identified, provided that she was able to do
3 so truthfully without contradicting the allegations in her
4 original complaint. The Court further stated that Plaintiff was
5 not permitted to add any additional causes of action without leave
6 of the Court. Finally, the Court denied Defendant's request to
7 dismiss or stay the proceedings based on the primary jurisdiction
8 doctrine.

9 In her 2AC, Plaintiff alleges the following. She claims that
10 by prominently featuring, on the front of the package,
11 the claim "Healthy, Sustained Energy" in connection
12 with the statements "Protein Nutrition Shake" and "25g
13 PROTEIN" on Muscle Milk® Ready-To-Drink (RTD), and the
14 claims "25g PROTEIN for Healthy, Sustained Energy" and
15 "0g Trans Fat" on Muscle Milk® Bars, Cytosport falsely
16 represents the healthy and nutritious nature of the
17 Products, and misleads consumers. Such claims, along
18 with phrases like "healthy fats" and "good
19 carbohydrates," draw consumer attention away from
20 unhealthy ingredients, including fat, saturated fat,
21 and added sugars. . . .

22 The central message of these claims is that the
23 Products are not loaded with unhealthy fats and added
24 sugars, and that consuming them provides a wide range
25 of significant nutritional benefits. This message,
26 however, is false, misleading, deceptive, and unfair.

27 2AC at ¶ 5 and 6.

28 Unlike the 1AC, the 2AC shows two different versions of the
front of the fourteen ounce RTD bottle. The first version shows
the bottle, as represented in the 1AC, which includes the
statements "HEALTHY, SUSTAINED ENERGY," "protein nutrition shake"
and "25g PROTEIN." This version was phased out of production
starting in February 2011. The front of second version of the RTD
bottle, first placed into the stream of commerce in February 2011,

1 does not include the statement "HEALTHY, SUSTAINED ENERGY," but
2 includes the statements "protein nutrition shake" and "25g
3 PROTEIN." Both versions of the RTD bottle state on the back,

4 MUSCLE MILK IS AN IDEAL BLEND
5 OF PROTEIN, HEALTHY FATS,
6 GOOD CARBOHYDRATES
7 AND 20 VITAMINS AND MINERALS
8 TO PROVIDE SUSTAINED ENERGY,
9 SPUR LEAN MUSCLE GROWTH AND HELP PROVIDE RECOVERY
10 FROM TOUGH DAYS
11 AND TOUGHER WORKOUTS.

12 The 2AC does not include allegations concerning the seventeen
13 ounce bottle.

14 Plaintiff claims that the misrepresentations on the product
15 labels are compounded by false statements on Defendant's website.
16 2AC at ¶¶ 28 and 42 (noting that the RTD product website claims
17 that the drink "promotes healthy sustained energy," and that it
18 provides "healthy fats" and "good carbohydrates," and the website
19 for the bars states that "there's no question [consumers are]
20 getting a nutritious snack" and that the bars deliver "healthy
21 sustained energy"). Furthermore, Defendant's television
22 advertising allegedly features images of the label from the
23 fourteen ounce RTD bottle, including its claim, "Healthy,
24 Sustained Energy." 2AC at ¶ 30.

25 Plaintiff further alleges that Defendant's product labeling,
26 including the "use of the healthy sounding 'Muscle Milk' name and
27 its false and misleading nutrient content claims" are a violation
28 of law. 2AC at ¶ 7. She continues to claim that the fourteen
ounce RTD product contains "bad fats," such as saturated fat,
despite the label's and website's representation that it provides
"healthy fats."

1 Plaintiff further alleges that, contrary to Defendant's "good
2 carbohydrates" representation on the RTD labeling and website, the
3 drink contains simple sugar fructose, which has been linked to
4 "lipid dysregulation, increased visceral adiposity, and decreased
5 insulin sensitivity, all of which have been linked to
6 cardiovascular disease and type 2 diabetes." 2AC at ¶ 25.
7 Furthermore, the RTD product contains acesulfame potassium (a/k/a
8 Acesulfame K) and sucralose, which have been identified by Whole
9 Foods, a retailer specializing in healthy and organic foods, as
10 "Unacceptable Ingredients for Food." 2AC at ¶ 25.

11 With respect to the Muscle Milk® Bars, Plaintiff claims that
12 these seventy-three gram bars are less healthy than a similarly-
13 sized 58.7 gram Snickers® bar because they contain as many
14 calories, as much sugar, and more grams of saturated fat and
15 sodium than the candy.

16 Citing certain studies, Plaintiff claims that

17 Muscle Milk® Bars also contain unhealthy ingredients
18 like fractionated palm kernel oil, and partially
19 hydrogenated palm oil, a trans fat. Plaintiff is
20 informed and believes, and on that basis, alleges that
21 palm oil is high in saturated fat and is often used as
22 a substitute for partially hydrogenated vegetable oil
23 (i.e., trans fat). Plaintiff is informed and
24 believes, and on that basis, alleges that studies,
25 however, have suggested that palm oil may be just as
26 unhealthy as partially hydrogenated vegetable oil.
27 Additionally, Plaintiff is informed and believes, and
28 on that basis, alleges that the World Health
Organization has convincingly linked palmitic acid,
which is present in palm oil, to increased risk of
cardiovascular disease.

Plaintiff is informed and believes, and on that basis,
alleges that palm oil can be processed to create
variants, including palm kernel oil and fractionated
palm kernel oil. Plaintiff is informed and believes,

1 and on that basis, alleges that the healthful aspects
2 of natural palm oil, if any, are largely lost in the
3 processing. Indeed, of all the varieties of palm oil,
4 Plaintiff is informed and believes, and on that basis,
5 alleges that the form that is used in Muscle Milk®
6 Bars, fractionated palm kernel oil, is the least
7 healthy. Plaintiff is informed and believes, and on
8 that basis, alleges that palm kernel oil is a cheap,
9 unhealthy fat, and unlike ordinary palm oil, palm
10 kernel oil cannot be obtained organically. Instead,
11 Plaintiff is informed and believes, and on that basis,
12 alleges that fractionation is a further phase of palm
13 oil processing, designed to extract and concentrate
14 specific fatty acid fractions. Plaintiff is informed
15 and believes, and on that basis, alleges that
16 fractionated palm oil, as found in food products, has
17 a higher concentration of saturated fat than regular
18 palm oil and is used for the convenience of
19 manufacturers like Cytosport who like its stability
20 and melting characteristics.

21 2AC at ¶¶ 37-38.

22 These passages mirror the allegations in Plaintiff's 1AC,
23 except that Plaintiff now directly claims that partially
24 hydrogenated palm oil is a trans fat.

25 Plaintiff newly alleges that the "Vanilla Toffee Crunch"
26 flavored bars contain thirteen grams of fat and ten grams of
27 saturated fat, despite their labeling, which represents that they
28 have ten grams of fat and eight grams of saturated fat.

The 2AC, unlike the 1AC, borrows from regulations established
by the Food and Drug Administration (FDA) to allege that certain
nutrient claims on the products are false and misleading.

Plaintiff claims that California law, specifically the Sherman
Food, Drug and Cosmetic Law, California Health and Safety Code

1 section 109875 et seq., adopted the requirements of federal food
2 labeling regulations.

3 Under § 403 of the Federal Food, Drug and Cosmetic Act
4 (FDCA), a statement that characterizes the level of a nutrient in
5 a food is a "nutrient content claim," and such claims can only be
6 made if they comply with FDA regulations concerning those claims.
7 21 U.S.C. § 343(r)(1)(A). An "expressed nutrient claim" is
8 defined as "any direct statement about the level (or range) of a
9 nutrient in the food, e.g., 'low sodium' or 'contains 100
10 calories.'" 21 C.F.R. § 101.13(b)(1). An "implied nutrient
11 content claim" is defined as any claim that

12 (i) Describes the food or an ingredient therein in a
13 manner that suggests that a nutrient is absent or
14 present in a certain amount (e.g., "high in oat
bran"); or

15 (ii) Suggests that the food, because of its nutrient
16 content, may be useful in maintaining healthy dietary
17 practices and is made in association with an explicit
claim or statement about a nutrient (e.g., "healthy,
contains 3 grams (g) of fat").

18 21 C.F.R. § 101.13(b)(2)(i)-(ii).

19 Section 101.65(d)(2) provides that food labeling "may use the
20 term 'healthy' or related terms (e.g., 'health,' 'healthful,'
21 'healthfully,' 'healthfulness,' 'healthier,' healthiest,'
22 healthily,' and 'healthiness') as an implied nutrient content
23 claim if, among other things, the food meets the regulatory
24
25
26
27
28

1 definitions for low fat and low in saturated fat, and contains a
2 certain minimum amount of nutrients.²

3 Specifically, Plaintiff claims that the label and website for
4 the fourteen ounce RTD product are misleading because the drink
5 exceeds the amount of fat permitted to qualify as a "low fat"
6 product under FDA regulations. 2AC at ¶ 69. According to the
7 complaint, as a result of the drink's failure to meet the standard
8 for a "low fat" product, the RTD label may not, under
9 § 101.65(d)(2), use the term "healthy" or related terms. 2AC at
10 ¶ 69.

11 Similarly, Plaintiff asserts that the label and website for
12 the bars falsely represent the healthfulness of the food and its
13 ingredients, because the fat content exceeds the amount permitted
14 by FDA regulations setting the standard for products labeled "low
15 fat," 21 C.F.R. § 101.62(b)(2), and the saturated fat content
16 exceeds the amount permitted by the regulation setting the
17 standard for foods labeled as "low in saturated fat." 21 C.F.R.
18 § 101.62(c)(2). 2AC at ¶¶ 70-71. As a result, the Muscle Milk®
19 bars did not meet the regulatory standard under § 101.65(d)(2) for
20 a product labeled with the word "healthy" or related terms. 2AC
21 at ¶¶ 70-71.

22
23
24 ² Section 101.65(d)(2)(i) provides a matrix listing
25 categories of food and, according to each category of food, the
26 standards for fat, saturated fat, cholesterol and other nutrients.
27 The standards cross-reference the levels set forth in
28 § 101.62(b)(2) and (c)(2), among others, which identify when a
product may be labeled with the express nutrient claims "low fat,"
"low saturated fat" or similar terms.

1 Finally, Plaintiff also alleges that, to prevent companies
2 from making misleading claims that distract consumers from
3 unhealthy levels of fats, saturated fats, or sodium contained in
4 products, 21 C.F.R. § 101.13 prohibits companies from making
5 unqualified nutrient content claims if their products exceed
6 specified levels of those unhealthy substances. 2AC at ¶ 63. If
7 the products exceed those levels, their labeling must contain a
8 disclosure statement, referring to the nutrition information.
9 Plaintiff claims that, in light of these regulations, the bars'
10 label is misleading because it states "0g Trans Fat," while the
11 product contains more than four grams of saturated fat and its
12 label omits the disclosure statement, "See nutrition information
13 for saturated fat content." 2AC at ¶ 64. Plaintiff claims that
14 Defendant "misdirects consumers to a nutrient in Muscle Milk® Bars
15 that purportedly is low, while failing to draw consumers'
16 attention to the harmful levels of the saturated fat that they are
17 obligated to disclose." Id.

18 Plaintiff has added certain allegations concerning the extent
19 of Defendant's advertising campaign for the products. She claims,

20 According to the Declaration of Roberta White,
21 Cytosport's Vice President of Corporate
22 Development . . . filed in [other litigation] . . .
23 "Cytosport has spent tens of millions of dollars
24 promoting and advertising the MUSCLE MILK® ready-to-
25 drink product . . . and has spent over \$100 million
26 dollars promoting the MUSCLE MILK® brand generally."
27 Additionally, according to Ms. White's declaration,
28 "Cytosport advertises the MUSCLE MILK® ready-to-drink
product over the Internet, in magazines, on
billboards, through paid professional endorsements,
agreements with academic institutions, at tradeshow,
sporting events, bodybuilding competitions, and
through other media outlets."

1 Finally, Plaintiff newly alleges, "In deciding to purchase
2 the Products, Plaintiff saw and relied on the representations on
3 the false, misleading, and misbranded packaging of Cytosport's
4 Muscle Milk® Ready-To-Drink (RTD) and Muscle Milk® Bars products,"
5 including the specifically alleged misrepresentations on the
6 products. 2AC at ¶ 74. Plaintiff further alleges that she "saw
7 and relied" on the alleged misrepresentations provided on the
8 website and in Defendant's television advertisements. 2AC at
9 ¶ 76.

10 LEGAL STANDARD

11 I. Sufficiency of Claim under Rule 12(b)(6)

12 A complaint must contain a "short and plain statement of the
13 claim showing that the pleader is entitled to relief." Fed. R.
14 Civ. P. 8(a). On a motion under Rule 12(b)(6) for failure to
15 state a claim, dismissal is appropriate only when the complaint
16 does not give the defendant fair notice of a legally cognizable
17 claim and the grounds on which it rests. Bell Atl. Corp. v.
18 Twombly, 550 U.S. 544, 555 (2007). In considering whether the
19 complaint is sufficient to state a claim, the court will take all
20 material allegations as true and construe them in the light most
21 favorable to the plaintiff. NL Indus., Inc. v. Kaplan, 792 F.2d
22 896, 898 (9th Cir. 1986). However, this principle is inapplicable
23 to legal conclusions; "threadbare recitals of the elements of a
24 cause of action, supported by mere conclusory statements," are not
25 taken as true. Ashcroft v. Iqbal, 129 S. Ct. 1937, 1949-50 (2009)
26 (citing Twombly, 550 U.S. at 555).

27 II. Federal Rule of Civil Procedure 9(b)

28 "In all averments of fraud or mistake, the circumstances

1 constituting fraud or mistake shall be stated with particularity."
2 Fed. R. Civ. P. 9(b). "It is well-settled that the Federal Rules
3 of Civil Procedure apply in federal court, 'irrespective of the
4 source of the subject matter jurisdiction, and irrespective of
5 whether the substantive law at issue is state or federal.'" Kearns v. Ford Motor Co., 567 F.3d 1120, 1125 (9th Cir. 2009)
6 (citing Vess v. Ciba-Geigy Corp. USA, 317 F.3d 1097, 1102 (9th
7 Cir. 2003)). The allegations must be "specific enough to give
8 defendants notice of the particular misconduct which is alleged to
9 constitute the fraud charged so that they can defend against the
10 charge and not just deny that they have done anything wrong."
11 Semegen v. Weidner, 780 F.2d 727, 731 (9th Cir. 1985). Statements
12 of the time, place and nature of the alleged fraudulent activities
13 are sufficient, id. at 735, provided the plaintiff sets forth
14 "what is false or misleading about a statement, and why it is
15 false." In re GlenFed, Inc., Secs. Litig., 42 F.3d 1541, 1548
16 (9th Cir. 1994).

18 DISCUSSION

19 I. Allegations of False and Misleading Statements

20 Defendant does not request that the Court reconsider its
21 prior ruling that Plaintiff alleged a cognizable misrepresentation
22 based on its labeling and advertising that the products contain
23 "healthy fats." However, Defendant argues that Plaintiff has
24 failed to allege any additional false or misleading statement
25 under the UCL, CLRA and FAL or her common law claims for fraud or
26 negligent misrepresentation.

27 Claims of deceptive labeling under these California statutes
28 are evaluated by whether a "reasonable consumer" would be likely

1 to be deceived. Williams v. Gerber Prods. Co., 552 F.3d 934, 938
2 (9th Cir. 2008) (citing Freeman v. Time, Inc., 68 F.3d 285, 289
3 (9th Cir. 1995)). Common law claims for fraud and negligent
4 misrepresentation similarly require that the consumer justifiably
5 rely on a representation that is false or subject to a misleading
6 omission. Robinson Helicopter Co., Inc. v. Dana Corp., 34 Cal.
7 4th 979, 990 (2004) (common law fraud); Century Sur. Co. v. Crosby
8 Ins., Inc., 124 Cal. App. 4th 116, 129 (2004) (negligent
9 misrepresentation). Federal Rule of Civil Procedure 9(b) applies
10 to claims sounding in fraud under the common law and statutory
11 law, requiring particularized pleading of alleged false
12 statements, and the basis for the claim of falsity.

13 A. Federal Food Labeling Regulations

14 Defendant argues that Plaintiff should not be permitted to
15 add allegations that rely on the FDCA and the FDA's regulations
16 promulgated thereunder. Defendant first argues that such
17 allegations violate the Court's prior order granting limited leave
18 to amend. Although Plaintiff did not include allegations based on
19 federal regulations in her 1AC, they do not contradict any facts
20 alleged in the previous complaint. Moreover, Plaintiff has added
21 no new legal claims. Although in her opposition she has
22 identified "good carbohydrates" as a purported misrepresentation,
23 this statement was included in her 1AC. None of Plaintiff's
24 allegations are beyond the scope authorized by the Court in its
25 prior order.

26 Defendant also argues that, based on the doctrine of judicial
27 estoppel, Plaintiff should be barred from amending her allegations
28 to include the FDA regulations. Judicial estoppel "is an

1 equitable doctrine invoked by a court at its discretion.'" New
2 Hampshire v. Maine, 532 U.S. 742, 750 (2001) (quoting Russell v.
3 Rolfs, 893 F.2d 1033, 1037 (9th Cir. 1990)). "In determining
4 whether to apply the doctrine, we typically consider (1) whether a
5 party's later position is 'clearly inconsistent' with its original
6 position; (2) whether the party has successfully persuaded the
7 court of the earlier position, and (3) whether allowing the
8 inconsistent position would allow the party to 'derive an unfair
9 advantage or impose an unfair detriment on the opposing party.'" United States v. Ibrahim, 522 F.3d 1003, 1009 (9th Cir. 2008)
10 (citing New Hampshire, 532 U.S. at 750-51). In addition, the
11 Ninth Circuit has stated that judicial estoppel "seeks to prevent
12 the deliberate manipulation of the courts," and therefore should
13 not apply "when a party's prior position was based on inadvertence
14 or mistake." Id.

16 Plaintiff's original position was that her claims did not
17 rely on FDA regulations. In contrast, the 2AC borrows from FDA
18 regulations setting general requirements for certain expressed and
19 implied nutrient content claims. As noted earlier, although these
20 allegations were not included in the previous complaint, they are
21 not inconsistent in the sense that they do not contradict any
22 prior allegations. Rather, the allegations respond to the Court's
23 ruling that certain words and phrases failed to support a claim
24 for fraud or negligent misrepresentation because they were
25 difficult to define and not clearly false. The FDA regulations
26 may lend objective criteria by which to determine whether certain
27 words and phrases used on the labels are misleading. Moreover,
28 the new allegations do not impose on Defendant any unfair

1 detriment. Defendant argues that, had it known that Plaintiff
2 would add allegations based on the FDA regulations, it would have
3 requested a determination on the FDA's primary jurisdiction in the
4 first instance. Defendant, however, did assert the primary
5 jurisdiction doctrine in its first motion to dismiss.
6 Furthermore, the issue of the FDA regulations is not a surprise
7 because Plaintiff submitted an FDA warning letter in her
8 opposition to the first motion to dismiss. The FDA's warning
9 letter was issued pursuant to the regulations Plaintiff now cites
10 in her 2AC. Plaintiff cannot be faulted for adding these
11 allegations in light of the Court's ruling that her allegations as
12 to the falsity of the product labeling were inadequate. Judicial
13 estoppel is unwarranted.

14 Defendant also argues that the allegations based on the FDA
15 warning letter do not support Plaintiff's claims that certain
16 words and phrases were misleading. In certain instances,
17 Plaintiff's 1AC did not state a claim for fraud or negligent
18 misrepresentation because the asserted terms were difficult to
19 define and Plaintiff failed to allege that the statements were
20 false based on some objective criteria. Thus, Plaintiff's
21 citations to FDA regulations provide objective criteria that may
22 support her contention that certain representations on the product
23 labeling are misleading. Plaintiff's theory is that the product
24 labels and website claim are false and misleading because they
25 represent that the products are "healthy" when, in fact, they
26 contain unhealthy ingredients or contain certain ingredients in
27 unhealthy amounts. The FDA regulations provide objective criteria
28 for determining whether products contain unhealthy ingredients or

1 certain ingredients in unhealthy amounts and, thus, whether a
2 cognizable misrepresentation has been alleged. The allegations
3 may support the falsity of the labels.

4 Finally, Defendant argues in a footnote that Plaintiff's
5 claims that make reference to FDA regulations are preempted by
6 federal law. Defendant argues that FDA regulations may not be
7 enforced by a private action. It contends that permitting private
8 enforcement of FDA regulations interferes with and obstructs the
9 agency's interest in nationally uniform food labeling regulations.
10 In support of its argument, Defendant cites 21 U.S.C. § 337(a),
11 which provides that all proceedings to enforce, or to restrain
12 violations under, the FDCA, "shall be by and in the name of the
13 United States," except for those actions brought by a state
14 pursuant to subsection (b). This provision preempts private
15 enforcement of FDA regulations, but it does not expressly preclude
16 all claims under state law that may involve food product labeling.
17 Indeed, § 343-1 of the FDCA, 21 U.S.C. § 343-1, authorizes states
18 to establish laws that are "identical to" federal labeling
19 requirements. In Farm Raised Salmon Cases, 42 Cal. 4th 1077, 1090
20 (2008), the California Supreme Court held, "While Congress clearly
21 stated its intent to allow states to establish their own identical
22 laws, it said absolutely nothing about proscribing the range of
23 available remedies states might choose to provide for the
24 violation of those laws, such as private actions." Accordingly,
25 the court held that § 337 of the FDCA did not impliedly preempt
26 the plaintiffs' state law claims, including their claims for
27 negligent misrepresentation and UCL violations, based on the
28 defendants' failure to disclose the addition of artificial food

1 coloring, as required by the FDCA and by the state's Sherman Law.
 2 Id. at 1099. In re Epogen and Aranesp Off-Label Marketing and
 3 Sales Practices Litigation, 2009 WL 1703285 (C.D. Cal.), a case
 4 upon which Defendant relies, is not persuasive because the Epogen
 5 court did not address the elements of the doctrine of federal
 6 preemption or § 343-1 in its decision or its order on the prior
 7 motion to dismiss in the case, and the case did not concern food
 8 product labeling. Farm Raised Salmon Cases, however, did address
 9 these factors.³

10 In sum, Plaintiff's new allegations referring to FDA
 11 regulations will not be dismissed.

12 B. The Asserted Statements

13 Plaintiff alleges that the statement, "Healthy, Sustained
 14 Energy," made on the fourteen-ounce RTD label in production prior
 15 to February 2011, and on the product website and its television
 16 ad, is misleading because it represents that the product is
 17 healthy, implying that the drink does not contain an unhealthy
 18 amount of fat. Although, as has been noted, a healthy product is
 19 difficult to define, Plaintiff now provides objective standards,
 20 such as the requirements identified by the FDA, which could
 21 evidence that certain contents in a product are not healthful. A

22 ³ Defendant also relies on Pom Wonderful, LLC v. Coca-Cola
 23 Co., 2012 WL 1739704 (9th Cir.), but the case is not applicable.
 24 There, the Ninth Circuit did not rule on whether the FDCA
 25 expressly preempted Pom's state law claims under the UCL and FAL.
 26 See id. at *6-7. Instead, after reversing the district court's
 27 ruling that Pom lacked standing under the UCL, the Ninth Circuit
 28 remanded the case for the district court to resolve whether the
 FDCA preempted state law claims. Id. The Ninth Circuit's
 preemption ruling was limited to a finding that the FDCA preempted
 Pom's claims under the Lanham Act.

1 representation that a product is "healthy" could reasonably lead a
2 consumer to believe that certain unhealthy contents are absent
3 from the product. For the purpose of this motion to dismiss, the
4 "Healthy, Sustained Energy" statement on the RTD labels is a
5 cognizable misrepresentation.

6 For similar reasons, the Court now finds that the statement,
7 "25g PROTEIN for Healthy, Sustained Energy," contained in the
8 label for the bars is also actionable. The statement conveys that
9 the bars are a healthy source of energy and, thus, may imply that
10 they do not contain an unhealthy amount of fat and saturated fat.
11 Plaintiff alleges that the bars contain excessive amounts of fat
12 and saturated fat, according to FDA standards.

13 In contrast, the term "good carbohydrates" contained on the
14 fourteen-ounce RTD label, is not actionable. Plaintiff has not
15 provided any objective criteria for determining that the added
16 sweeteners and sugars are in fact not good carbohydrates. Whole
17 Foods is a commercial retailer that markets expensive, purportedly
18 healthy, organic food, but Plaintiff has not alleged that its
19 scientific expertise or review process qualify the company to
20 identify objectively good or bad carbohydrates.

21 Plaintiff further alleges that the bars' label is misleading
22 because it contains the claim "0g Trans Fat." At the hearing,
23 Plaintiff clarified that she does not claim that the statement
24 misrepresents the amount of trans fat in the bars. Rather, she
25 alleges that the "0g Trans Fat" statement distracts consumers from
26 the product's unhealthy fat and saturated fat content. The
27 alleged distraction, however, does not amount to a false statement
28 or misrepresentation and, thus, is not an actionable claim.

1 Finally, Plaintiff claims that the Vanilla Toffee Crunch bars
2 contain amounts of fat and saturated fat that exceed the amounts
3 indicated on the product labeling. At the hearing, Plaintiff
4 stated that she was not suing based on misrepresentations as to
5 the amounts of fat and saturated fat but, instead, claims that the
6 statements as to fat and saturated fat content compound the
7 misleading nature of the product labeling. As noted earlier, the
8 Court found that the "Healthy, Sustained Energy" statement
9 contained on the label for the bars is actionable because it
10 conveys that the bars are a healthy source of energy and, thus,
11 may imply that they are free of unhealthy amounts of fat and
12 saturated fat. Plaintiff has not plead that the amounts of fat
13 and saturated fat indicated on the labeling for the Vanilla Toffee
14 Crunch bars indicate healthy amounts of the substances or somehow
15 create a deceptive context for the "Healthy, Sustained Energy"
16 statement. Thus, Plaintiff's Vanilla Toffee Crunch bar
17 allegations add nothing to her claim.

18 II. Reliance

19 A plaintiff seeking to prosecute a UCL and FAL claim is
20 required to demonstrate actual reliance on the allegedly deceptive
21 or misleading statements. Kwikset Corp. v. Superior Court, 51
22 Cal. 4th 310, 326 (2011). The CLRA imposes a requirement that a
23 violation "caus[e] or result[] in some sort of damage." Meyer v.
24 Sprint Spectrum L.P., 45 Cal. 4th 634, 641 (2009). Common law
25 fraud requires that the victim show reasonable reliance on the
26 allegedly deceptive representation. In re Tobacco II Cases, 46
27 Cal. 4th 298, 312 (2009).

1 The Court previously found that Plaintiff's allegation that
2 she was "exposed to" the product labels supported a weak inference
3 that she relied on them. Plaintiff's claims in the 2AC that she
4 "saw and relied" on the product packaging amount to stronger
5 allegations of reliance.

6 Plaintiff's claims of reliance on misrepresentations on the
7 website are now adequate. She has plead that she "saw and relied"
8 on the alleged misrepresentations on the website in deciding to
9 purchase the products. She also alleges that she saw and relied
10 on television ads. Thus, this case differs from Durell v. Sharp
11 Healthcare, 183 Cal. App. 4th 1350, 1363-64 (2010), where the
12 plaintiff did not claim that he ever visited the defendant's
13 website, containing the purported misrepresentations, and Kearns,
14 567 F.3d at 1125-26, where the plaintiff did not allege what the
15 television advertisements or sales material at issue specifically
16 stated, and did not allege when he was exposed to them or which he
17 found material.

18 With respect to Defendant's alleged long-term advertising
19 campaign, the Court previously held that Plaintiff inadequately
20 plead reliance on any elements of it other than those she saw.
21 The additional allegations regarding the scope of the advertising
22 campaign do not establish that the advertising campaign was as
23 lengthy or pervasive as the tobacco campaign. Cf. Tobacco II
24 Cases, 46 Cal. 4th at 327-28. Plaintiff has not alleged reliance
25 in connection with the advertising campaign because she has not
26 claimed that she saw and relied on any of the advertising, apart
27 from the product websites and television ads.

Dismissal of Plaintiff's claims based on her failure to allege reliance is denied; she adequately alleges reliance on the product labels and websites, and the television advertisements.

III. Preemption

Defendant again seeks dismissal of this action, or, in the alternative, a stay of the proceedings based on the primary jurisdiction doctrine. "The primary jurisdiction doctrine allows courts to stay proceedings or to dismiss a complaint without prejudice pending the resolution of an issue within the special competence of an administrative agency." Clark v. Time Warner Cable, 523 F.3d 1110, 1114 (9th Cir. 2008). "[T]he doctrine is a 'prudential' one," rather than one that indicates that the court lacks jurisdiction. Id. No "fixed formula" exists for applying the doctrine of primary jurisdiction. Id. at 1115. However, the Ninth Circuit has traditionally examined the following factors: "(1) a need to resolve an issue that (2) has been placed by Congress within the jurisdiction of an administrative body having regulatory authority (3) pursuant to a statute that subjects an industry or activity to a comprehensive regulatory authority that (4) requires expertise or uniformity in administration." Id. (internal alteration and quotation marks omitted).

Dismissal and a stay are unwarranted in this case because Defendant has failed to demonstrate that Plaintiff's claims under California law require the FDA's scientific or technical expertise. Certain of Plaintiff's claims now allude to FDA regulations, but only to the extent that they may provide criteria by which to judge whether certain nutrient content claims are misleading. These criteria are available in established federal

1 regulations. The FDA's expertise, however, is not necessary to
2 determine whether the labels are misleading. The reasonable-
3 consumer determination and other issues involved in Plaintiff's
4 lawsuit are within the expertise of the courts to resolve.
5 Application of the primary jurisdiction doctrine is not warranted.

6 CONCLUSION

7 Defendant's second motion to dismiss is granted in part and
8 denied in part. The claim in the 2AC as to misrepresentations
9 based the "good carbohydrates" statement, the allegation that the
10 "0g Trans Fat" statement distracts consumers from the product's
11 unhealthy fat and saturated fat content, and the claim that a
12 long-standing advertising campaign misled the public are not
13 actionable. Defendants' motion is otherwise denied.

14 Plaintiff shall notice any motion for class certification for
15 hearing on November 8, 2012 at 2:00 pm. A case management
16 conference will also be held that day, whether or not a motion for
17 class certification is filed.

18 IT IS SO ORDERED.
